

Reconnected support.

Looking for more ways to get
the most out of your new phone?

[Three.co.uk](https://www.three.co.uk)

Connecting to Wi-Fi.

Connecting to a free Wi-Fi network gives you internet access without using any of your monthly allowance.

You can connect to Wi-Fi in lots of different places, from the library to cafés and shopping centres.

It's really easy and you can find support on how to connect to Wi-Fi on our Support pages or alternatively, just visit a Three store.

The Cloud.

Download The Cloud app or visit their website to find out where you can get free Wi-Fi: www.thecloud.net/free-wifi

Three inTouch.

Three inTouch allows you to use your phone in areas with limited service. Simply download the free app, and you can make calls and send texts in the UK over Wi-Fi. Find out how to use Three inTouch.

Finding job adverts online.

You can look for jobs in your area with these useful websites:

- www.jobsite.co.uk
- www.totaljobs.com
- www.jobs.ac.uk
- www.monster.co.uk

Many of these sites allow you to set up free alerts so you can find out about all the latest jobs available, as soon as they're advertised.

Applying for roles online.

If you find a job you're interested in, you can copy the address to email it to yourself. It's then much easier to apply on a computer with a keyboard and a larger screen.

Your online profile.

Check the privacy settings on any personal online social accounts, such as Facebook, to ensure that only the people you know can see what you post online. This way you can keep your private life private.

Creating a profile on LinkedIn can be a really useful way to promote yourself to future employers. Find out more on www.linkedin.com

Support with digital skills.

For free advice, you can:

- Visit a Three store
- Visit one of our Discovery stores: www.three.co.uk/discovery
- Visit an online centre: www.onlinecentresnetwork.org
- Use the free materials provided on Learn My Way: www.learnmyway.com
